AGENDA

1. Apologies.
3. Tabling of Papers and Journals received from Other Societies.
4. Announcement of new members.
5. The following film will be shown:

"ARCHAEOLOGY IN THE LABORATORY"

This film describes the excavations directed by H. De Lumey in a cave near
Nice, Southern France. This is noteworthy for having recovered a beauti-
fully preserved palaeolithic dwelling floor within the cave area. The
film illustrates how various laboratory techniques have combined to
present an accurate picture of the cave dwellers activities and their
environment.

This film is extremely well done and is highly recommended.
